From the Town Manager

CANAL DREDGING PROJECT UPDATE

We have reached the point where the Town has secured a Spoils Dewatering site and the approval of our CAMA Major Permit is imminent. Accordingly, I am pleased to report that our Canal Dredge Project Manager has been officially appointed.

Please welcome Tom Bennett to the team. Tom was selected by Town Council after a very thorough search. Tom is very familiar with both the Town and the Canal Project. Tom will report directly to the Town Manager and will be interfacing with folks at every step of the project including, but not limited to; making formal and informal presentations to the various associations, and clubs in the Town as well as at Council Meetings to ensure we continue to get the word out to our citizens. Additionally, he will be including a Canal Project Update in each week's Broadcast – so stay tuned for his first Broadcast message on Friday.

Again, please join me in welcoming Tom to the team.
