

## Community Vision Statement

“The Town of Southern Shores is a quiet coastal community comprised primarily of low-density single-family homes interspersed with passive and active recreational facilities, maritime forests, and open space. The Town’s identity is intimately tied to its natural resources, history, and residential nature. We strive to protect Southern Shores’ environment, enhance the small commercial district located on the southern edge of town, and preserve the Town’s unique character by maintaining the existing community appearance and form.”
