Subject: Height and fill
Attachments: img037.jpg

Hey Wes,

Could you include this potential fill language and sketch to PB members for discussion at Monday's meeting? Thanks.

Andy

No fill material may be re-distributed or placed on a lot in the rear or side setback areas unless the final horizontal-to-vertical slope is equal to or less than 3:1. This shall be calculated from the finished final grade to the rear and side property lines.
